**1. P3 Consulting Associates - Presentation**

Council will hear a presentation by P3 Consulting Associates for new waste disposal process. The process called K2 "Katalytische Konversion" involves using mixed solid waste (MSW), which includes paper and plastic, and turning it into diesel fuel. Although metal, glass and concrete cannot be used in the process and must be removed before processing, the reduction in the amount of material going into landfills is significant. The City of Ridgecrest has worked diligently to find a solution to the problem of collecting and processing recyclable material. Using a process that has the potential to reduce the amount of refuse being placed in out landfills by as much as seventy-percent and therefore extend the life of our landfill is worthy of consideration. At the same time if this process can create diesel fuel at an economical price for use by the trash companies and school districts a second benefit occurs.

The firm presenting this project is P3 Consulting Associates LLC a California based organization. They are currently working with EnerTech RD, LLC from Texas and K2 Engineers from Germany. The process is in full commercial operation in Tarragona, Spain.

Council and Staff will hear and discuss possible ideas to amend the existing Local Assistance Plan.
