SMALL RESIDENTIAL ROOFTOP SOLAR ENERGY SYSTEMS CERTIFICATION FORM

In response to AB 2188 and the mandate to require only one inspection for eligible small residential rooftop solar systems (10 kw alternating current or less), completion of this form certifies all solar racking arrays and modules have been flashed, anchored and attached per the approved plans, manufacturer's specifications and industry standards. All work that is covered and not easily made accessible to the building inspector, must be certified by the contractor that it was performed properly.

If you opt to forego the certification, the building inspector must have access to perform adequate inspections of random anchors, flashing, grounding, etc. If it is not accessible for inspection, and the inspection is failed by the building inspector, subsequent inspections need not adhere to the one inspection requirement. If any inspection is failed by the inspector, it is no longer eligible for Certification. Please leave this signed Certification Form with the job card.

Permit Number: _____

Project Address: _____

I hereby certify the rooftop solar racking arrays, including stand-offs, flashing, and anchorage, have been installed according to the approved plans, manufacturer's specifications, and industry standards.

SMOKE ALARMS AND CARBON MONOXIDE ALARMS CERTIFICATION FORM

The California Residential Code (CRC) Sections R314 and R315 require that smoke alarms and carbon monoxide alarms be installed when alterations, repairs or additions are performed. Generally, the alarms are required to be hard-wired, have battery backups, and be interconnected. However, they may be solely battery-operated under certain conditions as outlined in the CRC. Please refer to the appropriate sections of the CRC for more information. The alarms are required to be installed prior to the final inspection. An adult must be present during the final inspection to allow an inspector within the home to verify compliance with the above requirements. If an adult will not be present, you may complete the portion below to certify smoke and carbon monoxide alarms are installed in accordance with the CRC.

If you opt to forego this certification, the building inspector must have access to perform adequate inspections. Failure to complete this Certification Form or provide access to the inspector will result in an unfinished permit and possible expiration/cancellation of the permit. Please leave this signed Certification Form with the job card.

Permit Number: _____

Project Address:

I hereby certify smoke alarms and carbon monoxide alarms have been installed in accordance with the CRC. (Must be signed by either the contractor or the property owner.)
